

## ABOUT HEALTHINFONET & THIS OPT-OUT FORM

What is HealthInfoNet? HealthInfoNet is a secure computer system that brings your health information from different healthcare locations into one statewide electronic health record. Your providers use this information to make better decisions about your care. It can also help them prevent mistakes, especially in an emergency. Your health record includes information about your medicines, allergies, test results, and more.

Are my records private and secure? HealthInfoNet encrypts all information and uses secure computer connections to receive and share your health information. Only those involved in your care can look at your information. To learn more about who has looked at your HealthInfoNet record and when they looked at it, you can visit <a href="http://hinfonet.org/for-patients">http://hinfonet.org/for-patients</a>. Note that no system is ever completely secure, but HealthInfoNet makes every effort to keep your records safe.

What does it mean to "opt-out"? Maine has separate rules about mental health/HIV information sharing. This sensitive information is kept private unless you choose to share it in your HealthInfoNet record. If you have previously chosen to include your sensitive health information in a HealthInfoNet record (i.e., you have opted-in), but would now no longer like to share your information with HealthInfoNet's participating providers, you must opt-out of this service. Completing this form will prevent your sensitive health information from being available to your providers, unless you give them one-time verbal consent or in the case of a medical emergency. For more information, you can visit our communication materials online: <u>http://hinfonet.org/for-patients.</u> Your choice to share or not share this information will not affect your ability to get medical care.
