

CORNERSTONE BEHAVIORAL HEALTHCARE

FAMILY SUPPORT GROUP REFERRALS

It is the mission of Cornerstone to provide a comprehensive service to its clients. Family members will be informed of the various support groups that are available in the area and if necessary a referral will be made. Family members will be assisted if they need help to access services.

The Cornerstone clinician will seek consultation from the Department of Health and Human Services as needed. Should there be a number of families desiring a support group, Cornerstone would consider the development of an Outpatient support group to meet this need.

Families receiving services from the Department of Health and Human Services can contact their DHHS caseworker about attending family support groups offered by the department. If needed, the Cornerstone clinician will help facilitate this contact.
