

Cornerstone Behavioral Healthcare

PM.28 Licensing of Staff

All clinicians/case managers will possess a current and valid State of Maine professional license, registration or certification that permits them to provide clinical services. All will provide proof of, and display, their professional license, registration, or certification. A copy will be placed in their personnel files. Clinicians/case managers are personally responsible for maintaining a current license, certification, or registration. In the event that a license, certification, or registration expires or otherwise becomes invalid, the clinician/case manager will not be allowed to work with clients until it is renewed or updated. When a license, certification, or registration is updated or renewed, clinicians/case managers must provide copies to Cornerstone Behavioral Healthcare (CBH).

It is the goal of CBH to provide the highest quality of care that conforms to established ethical guidelines. CBH has a multidisciplinary staff, and it is expected that all staff members behave in accordance with their respective professional code of ethics, or follow the Rights of Mental Health and Substance Abuse Consumers of the State of Maine, in the case of non-clinical staff.

In the absence of proof of current licensing, certification, or registration, the clinician/case manager may be suspended without pay until proof is provided.
